Profile

AI & Data Science undergraduate at IIT Jodhpur with hands-on experience in data analytics, statistical analysis, and mathematical modeling through academic projects. Skilled in Python, data visualization, and analytical problem-solving.

Technical Skills

- Python
- NumPy
- MySQL
- Data Analysis & Visualization
- Git & GitHub
- Excel

Projects

Business and Campaign Analysis – Simple Threads [🔗](#)

- Analyzed customer, product, purchase, and discount datasets to evaluate Quarter 1 business performance and campaign effectiveness.
- Identified key revenue drivers and optimal discount strategies using data visualization techniques.

Data Visualization and Correlation Analysis [🔗](#)

- Performed exploratory data analysis using box plots and summary statistics on real-world datasets.
- Applied Pearson and Point-Biserial correlation to interpret relationships between variables.

Understanding Financial Market Dynamics [🔗](#)

- Modeled inter-bank financial interconnectedness using matrices and eigenvalue analysis.
- Simulated market shocks and assessed portfolio risk using Python and linear algebra concepts.

Education

2025 – 2029
Jodhpur

Indian Institute of Technology Jodhpur
B.Sc. — Applied Artificial Intelligence & Data Science

2025
Jaipur

Hindustan International School
Senior Secondary School

2023
Jaipur

Ryan International School
Secondary School
